GRV Mining
Great Rift Valley Mining Summit II
13th -14th March 2014, Lusaka, Zambia

POST SUMMIT REPORT
Great Rift Valley Mining Summit II
13-14 March, Lusaka, Zambia
Summary

The Great Rift Valley Mining Summit II (GRV M II) organised by Entico Events opened on the 13th and 14th of March, 2014 in Lusaka, Zambia. We were pleased to see a diverse and exciting range of delegations from governments, international development agencies and private companies from the Great Rift Valley countries. The Summit provided an occasion to discuss aims, challenges and goals and announce opportunities, projects well as to present a programme for planned contracts for 2014 and beyond.

His Honour, Dr. Guy Scott, the vice-president of the Republic of Zambia opened the summit by presenting the unique position his country holds within the industry in the East Africa region. Hon. Christopher YALUMA, the Zambia Minister of Mines, Energy and Water Development, provided further information regarding Zambian mining industry.

The two days of the summit had planned presentations from the other ministers

- Hon. Mr. John BANDE, Malawi Minister of Mining
- Hon. Mrs. Esperança BIAS, Mozambique Minister of Mineral Resources and
- Hon. Mr. Peter LOKERIS, Minister of State, Uganda Ministry of Energy and Mineral Development

and other high level dignitaries

- Mr. Augustin KASANDA NGOY, Secretary General of Mines, Congo DR Ministry of Mines
- Mr. Athman SAID, Mining Secretary, Kenya Ministry of Mining
- Mr. Emmanuel UWIZEYE, Director of Land and Mines, Rwanda Ministry of Natural Resources
- Mr. Ezbon ADDE, Undersecretary for Mining, South Sudan Ministry of Petroleum, Mining Industry
- Mr. Abdulkarim MRUMA, Chief Executive Officer, Geological Survey of Tanzania
- Mr. Frank SEBBOWA, Executive Director, Uganda Investment Authority
The summit was also addressed by

- Mr. Saul RADUNSKI, Honorary Consul of Australia to Zambia, Consulate of Australia in Lusaka
- Mr. Solomon ASAMOAH, Deputy CEO and Chief Investment Officer, Africa Finance Corporation
- Mr. Sacha BACKES, Principal Investment Officer for Africa Mining, IFC - International Finance Corporation
- Mr. Andrew OCKENDEN, Lead Economist, UK Department for International Development (DFID)

The speeches highlighted the importance currently attached to developing local content in the mining industry, most importantly, through complementing the extraction phase with investment in and development of the processing and even manufacturing phases of the mineral value-chain, whereby ore and raw minerals would undergo more complex processes at or close to the mining site and within the country where they are mined from. The social and economic benefits of such aims for the African countries were clearly articulated by more than one speaker and highlighted as the new phase in which mining industry is expected to go in, reversing the century old trend of exporting all extracted minerals to foreign countries and, thus, benefitting only minimally from the mining industry. Hopes that multi-national enterprises holding mining rights in African countries as well as international development agencies would buy into and actively support this new African mining vision were expressed repeatedly.

Following morning speeches, the participants gathered around roundtables, scheduled during the afternoons of both the days of the summit, for a busy program of one-on-one meetings where business negotiations took place.

During the evenings of both the days, the participants gathered in the welcoming restaurant of the Intercontinental Hotel Lusaka for informal meetings which many of the participants saw as excellent opportunities for further networking.

A great number of the participants have expressed their satisfaction with both the format and the content of the summit, highlighting the wealth of information delivered through the morning plenary speeches and the direct, tangible benefits provided by the afternoon roundtable meetings.

We sincerely hope that, by bringing international expertise to East Africa, in some small way, the GRV M II helps the countries in this region develop their economies further and would very much like to see you all again at future Entico Events.

Testimonials

SPONSORS & DELEGATES

A very interesting summit with superb organisation, good informative presentations. Attendance beyond expectation. Look forward to the next one.

Hon. Christopher YALUMA,
Minister of Mines, Energy and Water Development of the Republic of Zambia
(main host and local partner)

We sold two of our crushing plant machines at the summit. We also made some very good contacts and identified other good opportunities to partner up for some interesting projects in East Africa. We found Entico staff very accommodating and friendly.

DanTin Distributors (Pty) Ltd

This was one of the best organised events. It was a pleasure to participate and would look forward to future events.

Hashi Energy

I like to thank you and the entire Entico team for a great summit. Very well organized, very good regarding the people participating and excellent regarding the help and the support we have received from you guys. We have felt like the most important guests ... and so have many the other guests. It was an illuminating experience watching you doing your art. See you at the next summit.

Gilat Satcom

The GRV Mining was well organised and has assisted to obtain business from various mining organisations. Thank you to the organisers. The presentations were very good, providing the audience with a lot of information. The roundtables provided networking opportunities for further business transactions.

Microlink (Gilat Satcom)

The summit was quite exciting, in particular the roundtables and chairing a session

AON Zambia Ltd

It was a good event, nicely managed and should be fruitful for us after so many roundtable meetings.

Dalbit Petroleum Limited

Very well organised & extremely professional. The presentations were relevant to the topics & high-powered. The event also provided an extremely successful networking platform: the roundtable meetings were with who I requested & the contacts I made will be of value for my future business trips & relationships.

Bell Equipment Co. SA (Pty) Ltd

I would like to extend a big thank you to the Entico team for a great event, this was well organized, professionally managed and overall very successful. The networking session were very beneficial and allowed us the opportunity to meet and interact with many of the key players within the mining industry. Thoroughly enjoyed it and hope to see to you all again next year!

BSI

I appreciated level of contacts and availability of the people; loved the one-to-one meetings.

Ecolog
I experienced the Great Rift Valley Mining Summit II as a very positive and interesting event where government, investors and industry could meet each other and exchange ideas on how to build a future for the mining of resources in the related countries. The setup of having interesting presentations in the morning and joining round table sessions in the afternoon works very refreshing and inspiring.

IHC Mining B.V.

Very well coordinated, interactive event showcasing potential opportunities in the region, highlighting infrastructure problems and opportunities for further business. Well done and thank you.

Kikia Enterprises Limited

I signed up for the next one. What more can I say?

Nitro Explosives (T) Ltd

Keith and myself enjoyed the event very much! We managed to get to speak to the ministers, meetings which normally takes a month of Sundays to arrange. The event was first class and the round table meetings are a fantastic idea.

Weatherford

Excellent arrangement. Congratulations!

African Barrick Gold

Thank you for the wonderful way in which you organised the summit in Lusaka. Please keep the momentum of your business as your approach was fantastic.

Sedgwick Resources Ltd.

The Mining Summit II was well organised and splendidly coordinated. The gathering of senior government officials from East African countries and the speeches given were both impressive and inspiring. The potential in ferrous metals, nonferrous metals, precious metals and stones mining in these countries was well articulated. The presence of International organisations such as African Finance Corporation, Department for International Development (DFID), and the International Finance Corporation (IFC) was a clear endorsement of the attractiveness of the Great Rift Valley region as a Mining investment destination. The Summit provided a good forum for mine owners to interact with suppliers of goods and services to the industry from exploration to finished product marketing and from ICT through security services to operations optimisation services. A truly worthwhile summit.

Chibuluma Mines Plc.

Very effective meeting for setting up connections with different multi-national companies. I very much appreciated being given the opportunity to present the work of our company. I will recommend more Chinese companies to attend future summits.

Henan Mining Corporation Zambia Ltd.

Very interactive and informative summit. The initiative will encourage investment and overcome many bottlenecks in key areas such as logistics, electricity and infrastructure development the Great Rift Valley.

Kachi Resources

Very good conference. If you can organise a similar summit in the DRC and invite a lot of mining companies.

Congo DRC Consulate in Zambia
A very intensive and engaging summit with every moment of it productive and enlightening. I haven’t seen such a diverse audience fully attentive and captivated during every session. The presentations were brief and comprehensive while the roundtables were where everybody took away worthwhile dividends. I enjoyed it!

Kenya Ministry of Mining

It was very good event, excellently organised. It allowed the participants to interact and it provided good opportunities to meet various companies and to do business. It was also good opportunity to exchange experience between countries. My congratulations to the organisers.

Mozambique Mining and Geology Institute

The Great Valley Mining Summit II was a very good meeting. Starting from the organization and the meeting itself. My congratulation!

Mozambique Ministry of Mineral Resources

Thank you for an efficiently run event that allowed most of us to learn a thing or two.

Uganda Investment Authority

Well organised event. Presentations were focused and meetings were engaging. I hope the meetings I had will drive more investment in Uganda in the near future.

Uganda Ministry of Energy and Mineral Development

The summit was a success and it was very informative. Provided a lot of interaction and member states provided with an opportunity to learn from one another’s challenges and successes.

Zambia Ministry of Foreign Affairs

DFID is interested in mining for the development benefits it can provide for a country. Delivering these benefits requires serious dialogue between a range of different stakeholders – all bringing their respective expertise, and balancing their interests. The summit provided an excellent opportunity to facilitate these conversations and develop the networks that will sustain them. Many thanks to both the organiser and sponsors for providing this opportunity.

BUY LOCAL EQUIPMENT, 
SCOTT TELLS MINES

By Kalonde NYATI

VICE-PRESIDENT Guy Scott has called on mining companies to buy locally manufactured equipment in their production processes to stimulate the growth of local industries. Dr Scott is concerned that mining companies import equipment used in the mining process and that this has adversely affected the growth of local industries in the manufacturing sector.

“One of the problems we have in the Zambian mining industry is lack of local content in the actual mining process. Mining companies import steel mills from New Zealand to mill copper ore instead of having the equipment made in our foundries.

“We used to make our own equipment but now everything is imported and the impact of this is industries on the Copperbelt have closed down,” Dr Scott said.

He said ZCCM-Investment Holdings (ZCCM-IH) has embarked on an initiative aimed at enhancing local content in the industry.

Dr Scott said this during the official opening of the 2nd Great Rift Valley Mining Summit in Lusaka yesterday. The two-day summit has attracted mining countries and companies along the Great Rift Valley to showcase their mineral potential and exchange ideas to improve mining sectors in respective countries.

Dr Scott said African countries should also add value to raw materials before exporting them.

“The conference is taking place at a time when a lot of countries are discovering minerals. Therefore, African countries need to take advantage of the situation by moving away from being exporters of raw materials to being exporters of processed products,” Dr Scott said.

He said Government is open to dialogue with various stakeholders on how best adding value in the mining industry can be advanced for the benefit of the country.

Minister of Mines, Energy and Water Development Christopher Yaluma said Government is currently analysing the mining value chain involving exploration, mine production, processing, refining and export to come up with an effective minerals monitoring and auditing mechanism.

“An effective and efficient minerals monitoring and auditing mechanism will not only ensure that what is due to Government in terms of revenue is paid but will also encourage transparency and eliminate the perceptions of widespread tax avoidance practices within the mining sector,” Mr Yaluma said.

He also said Government is pursuing a programme of diversification by promoting the exploitation of other minerals, particularly those with potential to spur the development of the manufacturing sector.

Mr Yaluma said the performance of the mining industry has improved since privatisation.

“The performance of the mining industry has tended to improve during private control as opposed to the times of state ownership. For this reason, Government is committed to maintaining an environment that is conducive for private sector participation,” Mr Yaluma said.
A two-day meeting aimed at unlocking the mineral potential of Africa’s Great Rift Valley sub-region opened in the Zambian capital yesterday with vice president Guy Scott challenging countries to seriously considering investing in value addition of the minerals to increase earnings.

---

VICE-PRESIDENT Guy Scott has advised countries along the Great Rift Valley to explore means of adding value to minerals before they are exported to increase their revenue base. Dr Scott cited lack of local content to minerals as one of the challenges facing countries along the Great Rift Valley.

Officiating at the opening of the Great Rift Valley Mining Summit in Lusaka yesterday, the Vice-President said countries along the Great Rift Valley should address the lack of local content for them to derive economic benefits from copper and other minerals the region was endowed with.

---

Zambia Needs to Explore and Exploit minerals that remain unutilized in the mining sector. Speaking when he was officiating at the Great Rift Valley mining summit in Lusaka, vice president Guy Scott says Zambia needs to start adding value to the minerals produced in the sector.

And Mines Minister, Christopher Yaluma, says a number of developmental assessment programs are being put in place to monitor and ensure growth in the mining sector.

---
